

STAINLESS STEEL CONVEX MIRRORS

Applications and benefits. Durability that supports safety.

APPLICATIONS

01

Roads and car parks

- Hillside and mountain roads
- Side-road exits
- Junctions
- Car park entrances and exits

02

Public institutions

- Schools
- Hospitals
- Prisons

03

Industry

- Petrochemical plants
- Steel mills
- Offshore oil platforms
- Factory service roads
- Heavy industrial sites

04

Transport and logistics

- Airports
- Railway stations
- Bus stations
- Seaports
- Warehouses
- Container terminals

BENEFITS AND MARKETS

Product value

- Stainless steel strength and durability
- Reduced wear and maintenance needs
- Visibility that supports safety

Key markets

- Infrastructure and public or private facilities
- Industry, transport and logistics
- A wide range of installation needs

Business opportunities

- A range for different applications
- Durability as a selling point
- Local support for customers and distributors

Illustrative reflection.

Support from Brescia

Warehousing, logistics, customer service and technical assistance: local support for product selection and supply management.

Visibility

Extends the view at entrances, junctions and blind spots.

Weather resistance

The stainless steel lens resists wear and weather exposure.

Versatility

Solutions for roads, industry, public facilities and logistics.

Safety over time

A durable lens serves its purpose for longer, with reduced maintenance needs.
